MEMORANDUM FOR: Assistant Deputy Director for Science  
and Technology

SUBJECT: Early Warning Review

1. Attached is a copy of a memorandum which I have just written Ray Cline soliciting his confirmation of an input from J. J. Hitchcock to [redacted] report. The two major contributions, apart from [redacted] own work and the study already prepared by [redacted] would include the proposed report from J. J. and the study which [redacted] is now preparing on requirements for advanced new systems. 25X1

MEMORANDUM FOR: Deputy Director for Intelligence

SUBJECT: Early Warning Review

1. As you probably know, we are now pressing [redacted] review of early warning intelligence to what I hope will be a fairly speedy conclusion. After long delays, in large measure due to [redacted] emphysema, he has now returned to the attack, has just visited NORAD and SAC headquarters, and leaves next Sunday for a short visit to [redacted]

25X1

2. J. J. Hitchcock was present during the visits to NORAD and SAC and will accompany [redacted] From the outset it has been obvious that the value of the early warning report will be determined in very large measure by Hitchcock's contribution. I sincerely hope that he will be able to devote sufficient time to this to complete the preparation of a section on the exploitation of early warning data, including an analysis of the NIC, its interrelationship with other elements of the intelligence community and field commands, together with recommendations for improvements in its general approach to the whole field of exploitation of these kinds of data. His recommendations would presumably be based on conclusions concerning the validity of existing indicators, the effectiveness of current procedures for screening and identifying data of early warning significance, the adequacy of current arrangements for orchestrating the facilities of various levels and elements of the intelligence community for analysis and evaluation of particular data, the adequacy of automatic data processing, etc., etc.

3. I don't know exactly how long it would take J. J. to complete a draft input to [redacted] report along these lines. I would hope not too long and I believe that the results to be expected from such a submission would more than justify the cost in terms of J. J.'s valuable time.
